Angelcare®

The leader in Movement Monitoring and baby care for over 21 years

Angelcare® was started in 1997 by a first-time father who understood how stressful it can be to care for a newborn baby. As new parents, Maurice Pinsonnault and his wife felt overwhelmed with worry not knowing whether their baby was sleeping safe and sound. It was a question that occupied their minds whenever they weren't in the room. Dissatisfied with the current selection of baby monitors available to them, they wanted a monitor that could go on better: one that could detect movement, especially the subtle movements babies make when asleep. Our first baby movement monitor used clever technology that could distinguish baby's slightest movements.

And so, Angelcare® was born.

Today, Angelcare® products employ advanced technology and innovative, research-based design. They are sold in 60 countries, and include award-winning monitors, nappy disposal systems and bath products.

Baby Monitors

Looks after baby, so you can relax.

Angelcare®'s research and development team works with leading designers to bring you innovative, high-performance baby products that remove the stresses of these important routines, allowing you to focus on a positive, nurturing experience with baby.

Our many models of baby monitors include state of the art technology like wall-mounted or tabletop Nursery Units, night vision and digital zoom and pan. Our audio is crystal clear and interference-free with a large range: all this combined with essential movement detection allow you to relax because baby is being monitored.

New Sensor Pad Smaller is Better!

- Available on all movement monitors from 2019
- Same performance as the current wired and wireless solutions
- Less interference between Sensor Pad and Nursery Unit, because of low-energy wireless transmission
- Secure low-energy technology
- One-time installation
- Safe, non-contact application
- Only alarms when needed, no data overload for parents

Our NEW smaller, SensASURE Wireless Movement Sensor Pad

AC327 (Art.no. 611102) Baby Movement Monitor, with Video

THE INNOVATION OF THE YEAR!

NOW PAIRING
2 SENSOR PADS
& 2 NURSERY
UNITS

The Angelcare® AC327 Baby Movement Monitor, with Video is a dependable, trusted and beautifully designed baby care essential. It has Angelcare®'s new 40% smaller Wireless SensASURE Movement Sensor Pad. Rest assured, the pad offers the exact same precise levels of movement detection. The monitor's alarm will only sound if no movement is detected after 20 seconds letting parents relax.

Advanced software allows a second Movement Sensor Pad and Nursery Unit combination to be added, meaning it's perfect for monitoring twins. You can also simply enjoy an extra Nursery Unit if you wish to monitor another child's room or even the playroom. The AC327 can also be used without the movement detection for those early toddler years.

NEW smaller, Wireless SensASURE Movement Sensor Pad

Wall-mount or tabletop Nursery Unit

An alarm will sound if no movement is detected after 20 seconds

Infrared Night Vision

4.3" Large LCD screen

Two-way talk back

Ideal for twins, you can add an extra Movement Sensor Pad & Nursery Unit*

Visual and audible Tic function

* Sold separately

AC027 (Art.no. 611100) Baby Movement Monitor

The AC027 is the perfect addition for parents who already own an Angelcare® Movement Monitor. The AC027 will complement the original monitor perfectly by adding Movement monitoring on the second mattress to your current setup. It's particularly useful if you need to monitor twins or 2 little ones in the same room. Do you already own a different brand of baby monitor but want to add in Movement monitoring for extra peace of mind now baby is here? The AC027 is perfect because it tracks the tiniest of movements and it will work with any other brand of baby monitor.

NEW smaller, Wireless SensAsure Movement Sensor Pad

Add movement detection to any brand or type of baby monitor

An alarm will sound if no movement is detected after 20 seconds

Perfect addition to any Angelcare® Movement Monitor if you need to monitor 2 babies in the same room

Battery operated

AC127 (Art.no. 611101) Baby Movement Monitor, with Sound

Angelcare®'s AC127 Baby Movement Monitor, with Sound combines market-leading movement detection with superb audio. It has Angelcare®'s new 40% smaller Movement Sensor Pad with SensAsure Technology. Our new compact design offers the same precise movement detection as previous Movement Sensor Pads. It will only alarm if no movement is detected after 20 seconds.

The Parent Unit features a room temperature display, perfect for parents wanting to adjust conditions in baby's nursery. This is complemented by a colour-changing temperature display on the Nursery Unit. Parents can soothe their little one by using the AC127's two-way talk back. By teaming movement detection with crystal clear audio, parents can relax knowing they'll be alerted when baby needs them.

-  NEW smaller, Wireless SensAsure Movement Sensor Pad
-  An alarm will sound if no movement is detected after 20 seconds
-  Room temperature display on the Parent Unit
-  Nursery Unit with colour-coded room temperature indicator
-  Two-way talk back
-  Digital secure sound transmission
-  Audible Tic function
-  Nursery Unit back-up batteries (not included)
