

For more safety and well-being

Over 90 years of experience and talking to parents have taught us what you need. Many innovative products that are simply indispensable in parenting households today were invented by us. Our practical aids make your everyday life easier – from pregnancy to pre-school age – and contribute to greater well-being. Together with our experts, we develop smart safety solutions that enable you to create a safe environment for your little one to grow up in, so you can relax while your young adventurer explores the world. With reer products, the whole family simply enjoys a feeling of all-round security. We love children and aim to give them a safe start in life – because what you love, you protect!

CHANGING TABLE HEATER

Cosy warmth for your baby

Protected from the cold

Newborns and babies have not yet developed the ability to adjust to changes in ambient temperature. Their small bodies cannot yet regulate their own temperature levels. A baby's skin is five times thinner than that of an adult! The insulating layer is missing. This is why, even in heated rooms, babies easily feel cold and are at risk from low temperatures, which is why babies should always be kept warm.

Cosy & consistent warmth for your baby

The reer heater for changing tables allows you to give your baby all the love and care they need and take your time over drying and dressing them after a bath. The heater immediately provides centred, cosy warmth and prevents exposure to cold and associated illness. Its pleasant, radiating warmth creates a consistent, feel-good space and prevents the drop in temperature your baby otherwise experiences. No more tears because of feeling cold after a bath or during nappy-changing!

Constant feel-good temperature during nappy-changing and after a bath

Did you know...?

... that the radiation and warmth distribution functions of our changing table heater have been tested to medical standards? This ensures that your baby never overheats, and that no excessive heat is centred on one part of their body. An additional benefit: The gentle heat speeds up the healing of rashes on your baby's delicate skin. Rashes heal much better if exposed to the air. With our changing table heater, you can leave your undressed baby to kick their legs for as long as they like!

Changing table heaters

The heater is available in different versions: with a stand or for installation on the wall and with one or two heat levels – adjusted to your baby's needs. An additional benefit: The gentle heat speeds up the healing of rashes on your baby's delicate skin.

Pioneer of child safety

What parents think:

„We bought it because our little one was cold and unhappy durnig changing. On Heat Setting 1 you can change nappies relaxed in the knowledge he is no longer cold. Setting 2 is perfect for after baths. Excellent warmer.“
(SEAN,Dad to Toby)

„I'm very happy, and my baby loves this warmer. You can easily take it from room to room, thanks thanks to the pedestal. The timer is perfect: if you forget to turn the warmer off, it automatically shuts off after 10 minutes. Great product!“
(HANNAH, Mum to Amelia)

„One of the best features about this product is the removable pedestal. It also heats up very quickliy and our son loves it. Heat Setting 1 ist almost always sufficient. Except after bathing: we then use Setting 2 to keep baby snug and warm.“
(LISA, Mum to Jospheh)

„My baby boy is 5 months old and loves to have a bath but as soon as I put him down on his changing mat after the bath, he screamed, until someone suggested a Nursery Heater. It's amazing. Just the right heat, in the right place: it keeps him very happy.“
(ANDY, Dad to Zack)
